

# Investigating Magma and New Landforms

## Clean-up Procedure

1. Keep any unused materials in your box (ex: a container of soil).
2. Throw away the used materials in your kit.
3. Clean the inside of your large, plastic box. Do not use water; just brush it out into a garbage can.
4. Get replacement materials for the next class. Your box should have:
  - a. 1 sealed plastic container of room temperature model magma.
  - b. 1 sealed plastic containers of soil
5. Return the kit to the back prep table.
6. Clean your table.
7. Return your goggles and aprons to the appropriate spot.
