

Unit 1 Handout _____

Lesson 5: CellCraft

Purpose: To introduce you to cell structures and functions.

Instructions: Visit 7bscience.com and click on the CellCraft link at the top right of the page. The game will teach you how to play and give you a variety of objectives. As you encounter new parts and resources, record them below. Write a short description of these parts and resources. If you miss the description, you can always click on the book in the upper right section of the game.

Part	Description
Pseudopod	<i>A temporary bulge or "foot" that some cells can use to move. This is not an actual cell part.</i>
Organelle	<i>A part of a cell that does a specific job (ex: nucleus, mitochondrion). Not all cell parts are considered organelles (ex: a ribosome is not an organelle).</i>
Centrosome	
Mitochondrion	
Ribosome
