

## Lesson 1: Thinking About Earthquakes

**Purpose:** To plot on a map where you think earthquakes occur.

**Guiding Question:**

- How does the location on the planet affect how likely an area is to have an earthquake?
- What do the patterns of where earthquakes occur tell us about our planet?

**Directions.** Draw dots on the map below that correspond to the locations where you think earthquakes happen. Create a legend or a key if you use different colors.
