

Purpose: Create a concept map based on what you know about volcanoes

Guiding Questions:

- How are volcanoes geologically constructive and destructive?
- How are the movement of earth's plates connected to the formation and eruption of volcanoes?

1. Read page 112 in the XPT book to introduce lesson 9.
2. Draw a concept map of the term volcano. Questions to consider:
 - a. How do volcanoes form?
 - b. What causes a volcano to erupt?
 - c. Are there different types of volcanoes?
 - d. Are volcanoes destructive? Constructive?
