

Unit 3 Handout 95

Lesson 9: Constructive and Destructive Effects of Volcanoes

Purpose: Create a t-chart on the constructive and destructive effects of volcanoes.

Guiding Questions: - How are volcanoes geologically constructive and destructive?

Instructions. Read pages 116-119 in the XPT book. As you read, record the constructive and destructive effects of volcanoes. Remember, in geology construction and destruction refer to the creation, recycling/breakdown of land forms.

Geologic Constructive Effects	Geologic Destructive Effects

In the box below, record other effects of volcanoes that are not geologically constructive or destructive. For example, those that are structural, biological, meteorological, etc.

Non-Geologic Constructive Effects	Non-Geologic Destructive Effects
